Energy Saving Calculations are now available whenever and wherever you are

BELL Lighting Energy Saving Calculator is a handy, easy to use tool for all lighting professionals. Simply enter your current and proposed lighting, along with electricity costs.

Hit calculate for full data including;

- Energy Saving
- Annual Cost Saving
- Savings Over Life Of Lamps
- Annual Energy Saving
- CO₂ Saving
- Built in option for control gear calculations

Lighting Design

A dedicated team of lighting engineers ready to help

Our team of professional lighting designers and engineers have over 50 years of experience in the lighting industry. We know the importance of good lighting design and the benefits a lighting engineer will bring to a project. Our lighting design service ensures correct light levels are achieved in compliance with current regulations.

Our specialised knowledge of lighting and lighting control systems provides a smooth hassle free process, delivering beautiful energy saving lighting solutions on time and on budget.

Working within the UK and internationally, the lighting team have established a reputation for designing a broad range of exciting projects of all sizes, from single rooms through to partnerships with multi-disciplined design teams on large infrastructure projects.

We are a responsive and fast moving team who can manage the complete lighting design process from concept through to the tender & supply.

lightingdesign@belllighting.co.uk

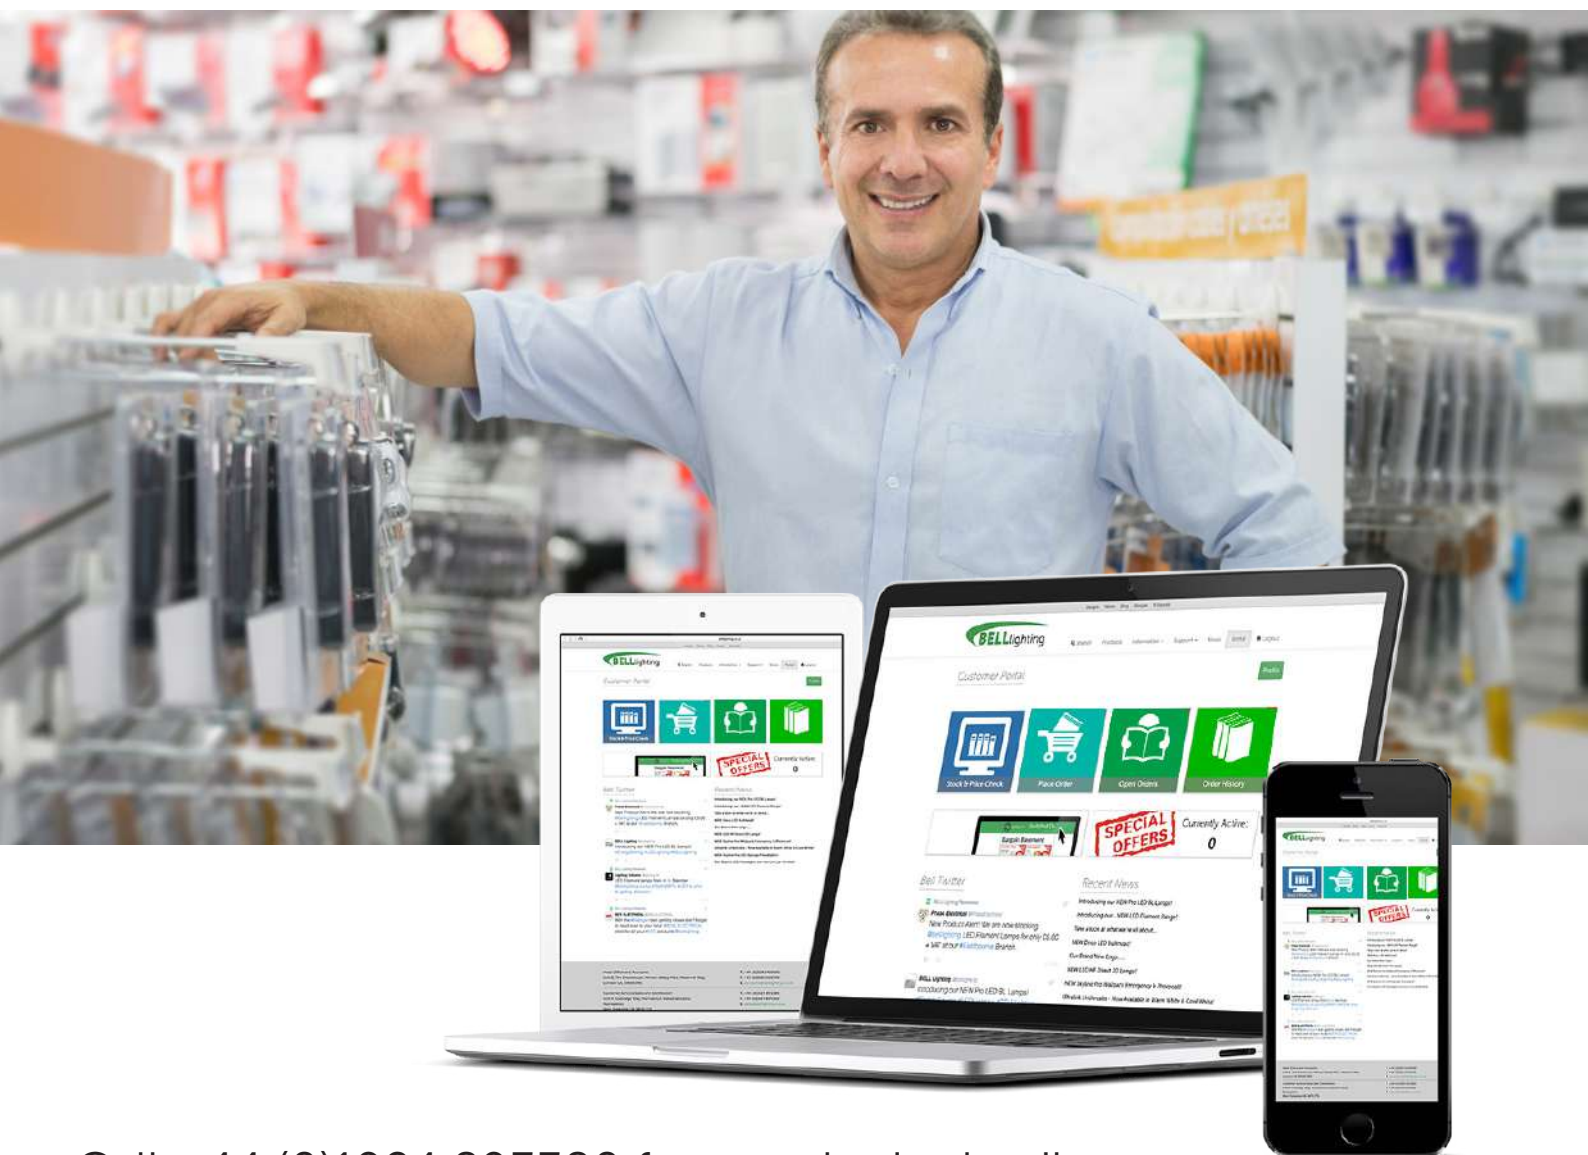

Customer Portal - log on to check stock, prices and place orders

All products and information are at your fingertips. Search by product code or browse by category – whichever you find easiest.

Our Customer Portal offers complete flexibility and can be used as a handy point of reference no matter what time of the day!

Check stock availability and prices of over 1000 products with a few simple clicks of your mouse.

Our new on-line ordering system is simple, fast and allows you to place your order whenever, wherever you want '24/7' via computer, tablet or mobile phone.

Call +44 (0)1924 893380 for your login details

Order before 16:00, receive goods the next working day*

We offer next day delivery to most parts of the UK along with a same day collection service.

Simply place your purchase order before 16:00, clearly mark that your purchase order is required the very next day and we'll take care of the rest!

With £5 million stock holding, we ensure the products you need are readily available day after day, week after week, year after year.

* Excluding first few days of each month

The BELL Difference

Research, Quality Control & Testing Facilities

British Electric Lamps Ltd. was established in 1920 and has built a reputation within the industry for manufacturing quality products and providing excellent service to our customers.

British Electric Lamps Research and Development department was established in 2012, this was augmented by the Lighting Laboratory and the Quality Control/Quality Assurance facility in 2014.

All products manufactured by British Electric Lamps undergo a stringent set of quality control procedures, carried out in accordance with: BS EN 60064:1995+A5:2009 / BS EN 60357:2003+A3:2011 / BS EN 60432-3:2013 / BS EN 60081:1998+A5:2013 BS EN 60901:1996+A5:2012 / BS EN 60968:2013 / BS EN 60669:1993 / BS EN 6115:1999+A1:2013 / BS EN 61199:2011+A1:2013 BS EN 62612:2013 / PD IEC/TR 62778:2012 / BS EN 62560:2012 / BS60598

Be assured that when you choose BELL lamps or fittings you are getting the most energy efficient units available today, saving you money, energy and reducing your carbon footprint.

Secure Life Testing Area situated on-site next to the National Distribution Centre, batch tests all manufactured items to ensure continuity to life standards.

Certificate Number 12255
ISO 9001: 2015

BELL products tested with all reputable dimmers to ensure flawless dimming performance

The Photometric Sphere tests all lamp output data; lumens, spectrum, colour temperature, power factor and actual power. This allows availability of photometric data and illumination data for lighting design schemes.

Thermal Imaging Cameras are used to ensure correct operation and thermal management of LED products. Thermal management is essential for LED products to prevent limited lamp life and lumen depreciation.

Extreme Electrical Conditions tests are carried out on each batch of our LED lamps in line with EN 62560:2012. All of the electrical safety tests are carried out after the lamps have aged at 35° C and 95% relative humidity in our environmental chamber.

Needle Flame Test this test is to ensure that all insulating parts lamps and fixtures are flame retardant.

Post production QC testing & inspection to ensure safe current protection of product.

Circuit Overload Protection and circuit wattage is tested on product batches to ensure safety and compliance to EN60598.

Extensive **Dimmer Compatibility Testing** is performed on all LED products to ensure performance of smooth dimming, high loading compatibility and overall stability.

Cap Torque Test, calibrated torque test is carried out on all lamps to ensure products retain cap strength before and after life testing.

Glow Wire Test is performed on all lamps and fixtures to ensure that construction materials are self extinguishing.

BELL celebrates 100 years in business 1920-2020!

In May 1920 Mr E R Grote, founder, established an incandescent lamp factory in Wimbledon, London manufacturing unique incandescent decorative light sources. The company is still completely owned by Chairman Michael Grote and Managing Directors Trevor & Ralph Grote.

1940

During World War 2 the lamp making machinery was converted to produce components for the military to help fight against the German war machine.

2013

New laboratory and Quality Control facility built on-site in Normanton to meet requirements for new stringent EU safety and performance standards.

1920

Mr E R Grote, Founder, established an incandescent lamp factory in Wimbledon, manufacturing unique incandescent decorative lights.

1980

A national distribution centre was established in West Yorkshire to facilitate national next day delivery across the UK and Southern Ireland.

2020

Further expansion of the warehousing capacity along with a state of the art showroom, conference facility & hospitality centre.

2020 Expansion

Moving forward into the new decade.

Due to continued growth, BELL Lighting have expanded into additional warehousing facility in the heart of West Yorkshire. With a combined 65,000 square feet, and stocking over 1600 individual product lines, BELL Lighting are able to deliver on time and on budget with our next day delivery service as standard.

To celebrate our centenary year, we have created our new state of the art conference facility, product showroom and entertainment suite. This is the perfect venue, with the ability to cater for up to 50 people, hosting conferences, meetings and product training sessions.

Post conference, meeting, or product training session, our entertainment suite is the perfect place to unwind and take a well-earned break. Showcasing the stunning effects Smart Lighting can create in any bar, hotel or restaurant, ideal atmosphere for networking with colleagues and the BELL team.

“Get to grips “Hands On” with our latest product releases, with the BELL Technical Team available to answer any questions”

Trevor Grote MD

Illumina

LED High/Low Bay

- Genuine replacement for 250/400W Metal Halide
- Suitable for High Bay and Low Bay applications 4 - 12m
- Fully sealed fixture, ideal for food preparation & cold store areas when used with plastic cover (code: 08833/08834)
- IP65 Base Unit
- Meanwell Driver
- Anthracite Finish
- Bridgelux LED
- 50000 Hours
- Now with 1-10V dimmable driver as standard
- Photocell option now available - Call for details

Optional infra-red remote control available for sensor versions

Quick and easy adjustment for multiple fittings; dimming level, presence detection, light levels & automatic on-off time. Average 15M range.

3 Step Dimming Function

With sufficient natural light, the light does not switch on when presence is detected.

With insufficient natural light, the sensor switches on automatically when presence is detected.

After the hold-time, the sensor dims the fitting to the pre-set low light level if no motion is detected.

Fitting switches off after the stand-by period has elapsed if no motion is detected.

IlluminaLinear

LED High Intensity High/Low Bay

Perfect for high ceiling warehouses, industrial facilities, exhibition centres, shopping malls & stadiums.

- Genuine replacement for 400W Metal Halide
- Suitable for High Bay and Low Bay applications 4 - 12m
- Built-in adjustable daylight sensor (sensor versions)
- Sensor parameters can be set by optional remote control (sensor versions)
- High efficiency up to 130lm/w
- Specially designed for warehouse aisles with the fittings rectangular lighting pattern's
- Long and narrow pattern's not only contribute to lighting lux levels but also give improved uniformity
- Lens can be replaced easily
- Multiple mounting options (suspension mount, adjustable surface mount)
- Emergency options available
- Self Test options available

SkylineELITE

Asymmetric/Symmetric LED Floodlight

Designed and engineered in the UK specifically to meet the requirements for sports lighting and to reduce light pollution levels. The Skyline Elite is a high specification floodlight with a 70,000 hour lifespan, 5 year guarantee and one year on site warranty.

- Genuine replacement for 250/400/600W Metal Halide/ Sodium Floodlight
- Perfect for sports, building facade's, landscape, security & car park lighting
- Asymmetric distribution, low light pollution*
- Up to 133 lm/W
- Surge protected up to 10,000 volts (250/240W) for lighting protection
- Cool White
- Aerodynamic, streamlined design for reduced windage
- Fully encapsulated IP66 TUV certified driver
- Nichia GRT-V1 LED / Meanwell Driver
- Long life 70,000 hours (L80 B10 @ 25° C)
- IK08 Impact Rating
- Robust construction IP66
- Standard universal mounting bracket
- Supplied pre-flexed (1.5M), tool free entry and construction for simple and quick installation

skylineELITE

Asymmetric/Symmetric LED Floodlight

Silicone Gasket.

High quality anti-corrosion resealable gasket.

Reflector.

High efficiency thermoplastic reflector.

High performance Lens.

Specially designed unique optical lens system providing optimal light control.

Nichia LED.

High efficiency LED using the latest Nichia GRT-V1 LED.

Clip Opening.

Ensures quality installation and future maintenance guarantee.

Die-cast Marine Grade Aluminium LM6 body.

Innovative shape for improved airflow and increased thermal efficiency and reduced windage.

LED Heat Sink

Specially designed flat contact area for correct LED thermal management.

Driver Heat Sink

Specially designed integral surface area heatsink to ensure driver thermal control.

IP69 Pressure Parity Compensator

Ensures pressure between the inside and outside of the fitting to maintain integrity and IP rating.

Cable Gland

IP68 Stainless Steel Cable Gland.

Angle Adjustment

Precise angle adjustment with tool free installation.

Toughened Glass Visor Shield.

Precision Designed Hinges.

For easy installation.

Meanwell HLG.

High performance IP66 resin encapsulated driver.

Contact BELL Technical Helpline for advice on compatible columns and correct mounting height.

Light Pollution

What is light pollution?

Most of us are familiar with air, water, and land pollution, but did you know that light can also be a pollutant?

The inappropriate or excessive use of artificial light – known as light pollution – can have serious environmental consequences for humans, wildlife, and our climate. Components of light pollution include:

Glare – excessive brightness that causes visual discomfort.

Skyglow – brightening of the night sky over inhabited areas, also known as upward light ratio (ULR).

Light trespass – light falling where it is not intended.

Clutter – bright, confusing and excessive light sources.

Light pollution is a side effect of industrial civilization. Its sources include building exterior and interior lighting, advertising, commercial properties, offices, factories, street lights and illuminated sporting venues.

The fact is that much of the outdoor lighting used at night is inefficient, overly bright, poorly targeted, improperly shielded, and, in many cases, completely unnecessary. This light, and the electricity used to create it, is being wasted by spilling it into the sky, rather than focusing it on to the actual objects.

Modern society requires outdoor lighting for a variety of needs, including safety and commerce. The Institute of Lighting Engineers recognises this but advocates that any

required lighting be used wisely. To minimise the harmful effects of light pollution, lighting should:

Only be on when needed / Only light the area that needs it / Be no brighter than necessary / Minimise blue light emissions / Be fully shielded (pointing downward).

The transition from sodium to LED exterior lighting over recent years appears to have made global light pollution worse not better, scientists have reported.

The findings are certain to increase the pressure on the lighting industry to take light pollution seriously and improve the optics and upward light control.

BELL LED Asymmetric Floodlights minimise light pollution.

Skyline Elite Asymmetric floodlights have been designed and developed to meet the strict requirements for a range of sports and area lighting applications.

Specifically designed to control obtrusive light, a precision lensing system ensures a tight beam pattern, reducing overspill upwards light and directing light only where it is needed.

BELL lighting is constantly striving towards reducing light skyglow (ULR), and the Skyline Elite Floodlight is at the forefront of this pollution reducing technology.

SkylinePRO

LED Floodlight

- Genuine replacement for 250/400W Metal Halide Floodlights
- Robust, anti-seize aluminium clip secured front cover for easy installation
- Fully encapsulated IP65 TUV certified Meanwell driver
- Rated voltage 110/240V, suitable for site lighting (Photocell version 240V)
- Suitable for cold storage

Marine grade version for coastal areas and shipping⁴

- 316 marine grade stainless steel brackets and fixings
- Cast LM6 aluminium body, anodised and powder coated with a special marine Akzo Nobel coating.

Options

- Photocell version complete with Lucy Zodion miniature photocell 55 lux - dusk to dawn
- Emergency version available
- Warm White & Daylight options

- Shatterproof
- IP65
- 7 year guarantee (Excluding Battery)³

Corridor Dim versions supplied complete with infra-red remote control.

Quick and easy adjustment for multiple fittings; dimming level, presence detection, light levels & automatic on-off time. Average 4M range.

Emergency versions must be tested in line with the requirements of BS5266, failure to do so may effect battery life and warranty.

With sufficient natural light, the light does not switch on when presence is detected.

With insufficient natural light, the sensor switches on automatically when someone enters the room.

When the room is empty, light dims to stand-by level (10% / 20% / 30%) after the hold-time.

Light switched off automatically after the stand-by period has elapsed.

Tri-Level Control (Corridor Function)

Offers 3 levels of light: 100%-dimmed light (10%, 20%, 30%)-off; and 2 periods of selectable waiting time: motion hold-time and stand-by period; selectable daylight threshold and choice of detection area.

¹ Exceeds EU standard of 70 for Lumens Maintenance Ratio
² Exceeds EU standard of RA 80 for Colour Rendering Index
³ Subject to terms & conditions (Contact Customer Service)

LED Integrated Batten

- The smart replacement for Single/Twin Fluorescent T8 and T5 Fixtures
- Special high light transmission frosted polycarbonate diffuser for smooth uniform lighting
- Perfect for all commercial environments
- Cool white
- Integrated controls
- Shatterproof
- Suitable for BESA Box mounting
- 8M detection range on corridor dim option
- 7 year guarantee (Excluding Battery)³

Emergency versions must be tested in line with the requirements of BS5266, failure to do so may effect battery life and warranty.

Data	
Construction	Polycarbonate
Driver	BELL
LED Chip	Samsung
IP Rating	IP54
Operating Temp	-20°C to +35°C / Emergency version minimum temperature -5°C
Input Voltage	220 - 240V
Power Factor	> 0.9
CRI	85 - Exceeds EU standard of Ra 80 for Colour Rendering Index
LMR	80 - Exceeds EU standard of 70 for Lumens Maintenance Ratio
L1A / L1B / L2A / L2B Compliant	No

* All BELL Lighting luminaires are rated L80 B10, so for a 50,000 hour product. L80B10 at 50,000 hours our fittings will still have 80% of initial lumen, only 10% of fittings will fail to achieve this.

06740 12W

Model	A Ø	B Depth
12W	250mm	48mm
18W	300mm	48mm
25W	300mm	48mm

Emergency versions must be tested in line with the requirements of BS5266, failure to do so may effect battery life and warranty.

With sufficient natural light, the light does not switch on when presence is detected.

With insufficient natural light, the sensor switches on automatically when someone enters the room.

When the room is empty, light dims to stand-by level (10% / 20% / 30%) after the hold-time.

Light switched off automatically after the stand-by period has elapsed.

Tri-Level Control (Corridor Function)

Offers 3 levels of light: 100%-dimmed light (10%, 20%, 30%)-off; and 2 periods of selectable waiting time: motion hold-time and stand-by period; selectable daylight threshold and choice of detection area.

Deco grande
CCT 3 way selectable colour switch

Selectable Colour Temperature

LED Bulkhead

- Selectable colour temperature 3000K/4000K/5700K
- Supplied with white trim. Chrome, satin, copper and antique brass trims available
- Colour change switch under diffuser for easy access
- The smart replacement for 2D and PL decorative fittings
- 8M detection range on corridor dim option
- Emergency option
- Microwave and corridor dimming function option
- 5 year guarantee (Excluding Battery)³
- 20mm side & rear entry conduit

LED Panel

UGR (Unified Glare Rating) is a method of calculating glare from light sources.

The UGR rating helps to determine how likely a light source is to cause discomfort to those around it. This classification ranges from 5 to 40, with low numbers indicating low glare.

Glare can be a common problem in workplaces. Inappropriate lighting or excessive brightness can be bounced off reflective surfaces, such as computer screens, whiteboards etc. This can cause disruption for the occupants of offices.

LED Panel

UGR (Unified Glare Rating) is a method of calculating glare from light sources.

The UGR rating helps to determine how likely a light source is to cause discomfort to those around it. This classification ranges from 5 to 40, with low numbers indicating low glare.

Glare can be a common problem in workplaces. Inappropriate lighting or excessive brightness can be bounced off reflective surfaces, such as computer screens, whiteboards etc. This can cause disruption for the occupants of offices.

Bluetooth Mesh Technology

Mesh is a network topology used for establishing many-to-many (m:m) device communications. The mesh topology available on Bluetooth enables the creation of large-scale device networks and is ideally suited for control, monitoring, and automation systems where tens, hundreds, or thousands of devices need to reliably and securely communicate with one another.

Use the BELL Smart Connect App to:

- Group lights in any configuration.
- Dim and change colour temperature.
- Create Scenes to store preferred settings, dim lounge lights to watch a movie.
- Set events, turn the lights on and off when you are away from home, or wake you up by slowly increasing the brightness of selected lights.

Input Voltage	220-240
Operating Temp	-30°C to +35°C
Lampholder	GU10

Use with BELL GU10's for optimum light performance

5W LED Halo GU10.

Ideal for all applications. Available in 3 colour temperatures, dimmable and non-dimmable.

6W LED Halo Glass GU10.

High lumen output with halogen look. Available in 3 colour temperatures, dimmable and non-dimmable.

6W Pro Precision LED GU10.

High lumen output, CRI 95. 10° / 20° beam angle, perfect when directional light is required. Available in 2 colour temperatures, dimmable.

See pages 126-127 for full range of compatible LED GU10 lamps

LUNA

Grande Outdoor Wall Light IP65

- Die-cast aluminium construction for durability and strength
- Compatible with GU10 LED and Halogen lamps
- Large size 265mm (height) x 145mm (depth) x Ø90mm
- Creates warm welcoming atmosphere to your outside space
- Dimmable when used with suitable lamp
- Features a frosted diffuser to emit a soft directional light

Lamps Not Included

Retro

Vintage Lantern

- Integrated version with frosted glazing (No lamp needed)
- Clear glazing for use with BELL ES/E27 Vintage and Soft Coil Lamps
- PIR versions available
- Manufactured from vandal resistant polycarbonate
- Tough, weather resistant IP54 construction
- Traditional, elegant designs
- Install close to doorways to optimise illumination for entrance areas
- 90° PIR detection area to minimise nuisance activations
- Cool White 4000K (Integrated version)

Use with BELL Photocell Vintage and Soft Coil lamps (Non Integrated versions)

LED Technology with the elegance of Incandescent lamps

- Ideal replacement for Incandescent Lamps
- Creates a welcoming atmosphere
- Smooth dimming on rotary and digital dimming systems
- Quartz Filament on Vintage and Filament lamps
- Amber Glass Coating for decorative vintage look on vintage lamps
- Over 90% Energy Saving compared to incandescent lamps
- Super low energy consumption

See LED lamps section for further details

Universal LED Trailing Edge Dimmer Module

10801

LED Dimmer Module

Ideal for replacing existing backplate dimmer modules when retro-fitting LED lamps or fittings
Suitable for dimming: **LED / CFL / Halogen / Incandescent**

Resistive Load

GLS - Min 10W ~ Max 250W

Mains voltage Halogen - Min 10W ~ Max 250W

Inductive Load

LV Halogen with dimmable magnetic transformer Min 10W ~ Max 250W LV Halogen with electronic transformer Min 10W ~ Max 150W

LED Load

LED Dimmable bulb - Min 5W ~ Max 120W - 10 lamps maximum

LED Dimmable driver - Min 5W ~ Max 120W - 10 lamps maximum

Compact Fluorescent Load

CFL Dimmable bulb - Min 15W ~ Max 250W

50

Smooth, flicker free, silent, buzz free dimming and no set up required

- Completely silent dimming
- Smooth flicker free dimming
- Wide dimming ranging from 100% to 10%
- Compatible with most lamps and fittings in the market
- 5w - 120w LED lamps (10 lamps maximum)
- 10w - 250w including Incandescent, Halogen & CFL lamps

Grid Dimmer

10800

LED Grid Dimmer

- Silent and flicker-free dimming
- Includes 8 black & white collars
- Compatible with all standard grid plates
- Push on
- 5-250W LED load

LED GU10 Dimming

LED Halo & Halo Elite GU10

Traditional halogen look with the energy saving benefits of LED

- Energy saving benefits of LED
- Up to 90 lm/W
- Rimless lens for improved aesthetics
- True fit GU10 size
- Suitable for fire rated and IP rated fixtures

6W LED Halo Glass GU10

Traditional halogen look with the energy saving benefits of LED

- True fit GU10 size
- High performance 86 lm/W
- Suitable for fire rated and IP rated fixtures
- 38° beam angle
- High grade driver designed for smooth dimming at min & max load levels, operating effectively with rotary and digital dimming system

Sharp SMT Multi LED Chip

Precision moulded polycarbonate lens to ensure precise beam angles

High performance aluminium heat sink, rated to 45° ambient temperature

BELL designed IC Driver for enhanced dimming performance

Surge protected circuitry at 3kV

Precision moulded polycarbonate lens to ensure precise beam angles

Sharp SMT Multi LED Chip

Shatterproof frost glass casing for safety and improved aesthetics

Unique IC Switch Driver designed for optimum dimming and flicker free performance

Ceramic heat sink for improved thermal management

Lighting Glossary - a guide to terms used in lighting

Wattage (W)

The unit for measuring electrical power. It defines the rate of energy consumption by an electrical device when it is in operation. The energy costs of operating a device is calculated as its wattage times the hours of use. In single phase circuits, it is related to volts and amps by the formula: Volts x amps x PF = Watts (Note for AC circuits PF must be included).

Lumens (lm)

A unit of light flow, or luminous flux. The lumen rating of a lamp is a measurement of the total light output of the lamp.

Light Output Ratio (LOR)

The ratio of the total light output of a luminaire, compared with total lamp light output.

Lux (lx)

A unit of illuminance or light falling onto a surface. One lux is equal to one lumen per square meter. Ten lux approximately equals one footcandle.

Candela (cd)

Unit of luminous intensity, describing the intensity of a light source in a specific direction.

Colour Rendering Index (CRI)

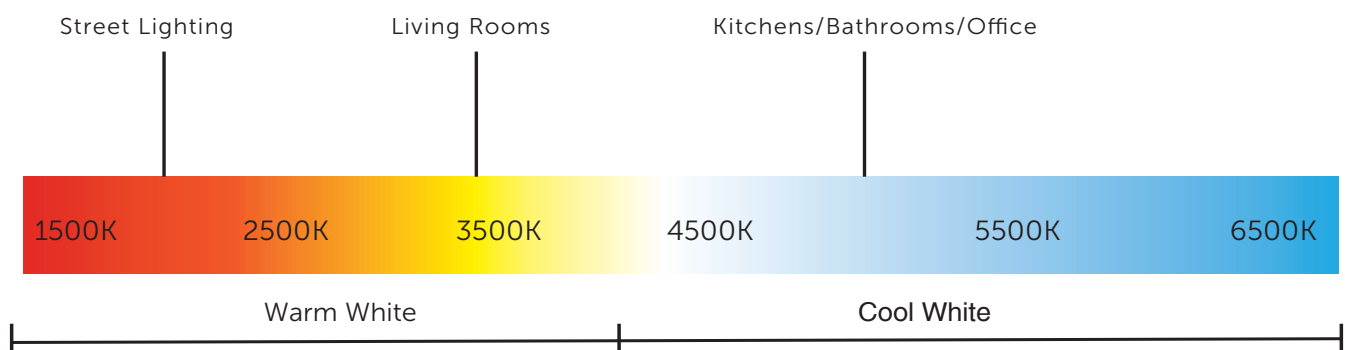

A scale of the effect of a light source on the colour appearance of an object compared to its colour appearance under a referenced light source. Expressed on a scale of 1-100, where 100 indicates no colour shift. A low CRI rating suggests the colours of objects will appear unnatural under that particular light source.

Lumen Maintenance Ratio (LMR)

The proportion of light output of a lamp after a stated period compared with initial lumen output.

Colour Temperature

The colour temperature is a specification of the colour appearance of a light source, relating the colour to a reference source heated to a particular temperature, measured by the thermal unit Kelvin. The measurement can also be described as the "warmth" or "coolness" of a light source. Generally, sources below 3200K are considered warm, while those above 4000K are considered cool sources.

The colour temperature of a light source is measured in degrees Kelvin. Above is a Kelvin temperature chart with examples of how colour temperature is used for different applications.

IP ratings

Classification of the degree of protection a luminaire provides against the entry of solid foreign bodies and moisture.

Ingress	Description	Protection	Short Description
0	Not Protected	0	Not Protected
1	Protection against solid objects greater than 50mm	1	Protected against dripping water
2	Protected against solid objects greater than 12mm	2	Protected against dripping water when tilted up to 15°
3	Protected against solid objects greater than 2.5mm	3	Protected against spraying water
4	Protected against solid objects greater than 2.5mm	4	Protected against splashing water
5	Protected against solid objects greater than 1mm	5	Protected against water jets
6	Dust protected	6	Protected against heavy seas
7	Dust Tight	7	Protected against the effects of immersion
		8	Protected against submersion

IP65 rated units are protected against dust and offer protection against water jets.

Recommended Light Levels - CIBSE Guidelines

Public areas with dark surroundings	10-50 Lux
Car parks	10-50 Lux
Warehouse racking	150 Lux
Brighter areas such as bathrooms	150-200 Lux
Warehouses, homes & theatres	150-200 Lux
Simple office work and classrooms	300-500 Lux
Normal office work with computers	300-500 Lux
Supermarkets and workshops	500-1000 Lux

Making the most of your lighting

Good lighting design recognises the need for depth of view. Both ambient and accent lighting should be used, whilst combining colour temperatures to create a more comfortable working environment.

Ambient lighting is the general lighting within an area and typically contributes 80% of the overall lighting level.

Accent lighting adds interest and depth to a design and should compliment but not conflict with the ambient lighting. This can include wall washing, the subtle use of colour, up lighting and spotlighting.

Typical Lighting requirements for commercial applications

Meeting & boardroom

The main lighting should be focused on the table areas. Allowing control of lighting near screens and displays. Use feature lighting to provide depth, and impact.

Office area

Allow for flexible use of the space so that desks can be repositioned. Consider using occupancy detection and natural daylight, this will require lighting control. Light emergency escape routes.

Reception

The reception area provides the first impression of a business. The main and accent lighting should be varied to provide an interesting environment.

Stairwells

Focus on safety ensuring good light levels. Also ensure the emergency requirements for escape are met.

Showroom

Focus should be on the products being displayed. Good CRI is important to ensure that colours are displayed correctly, BELL LED lamps have good and consistent CRI. Also consider the reliability of the lighting, a long lamp life is important or the products will become dimly lit over time as lamp performance deteriorates.

Exterior

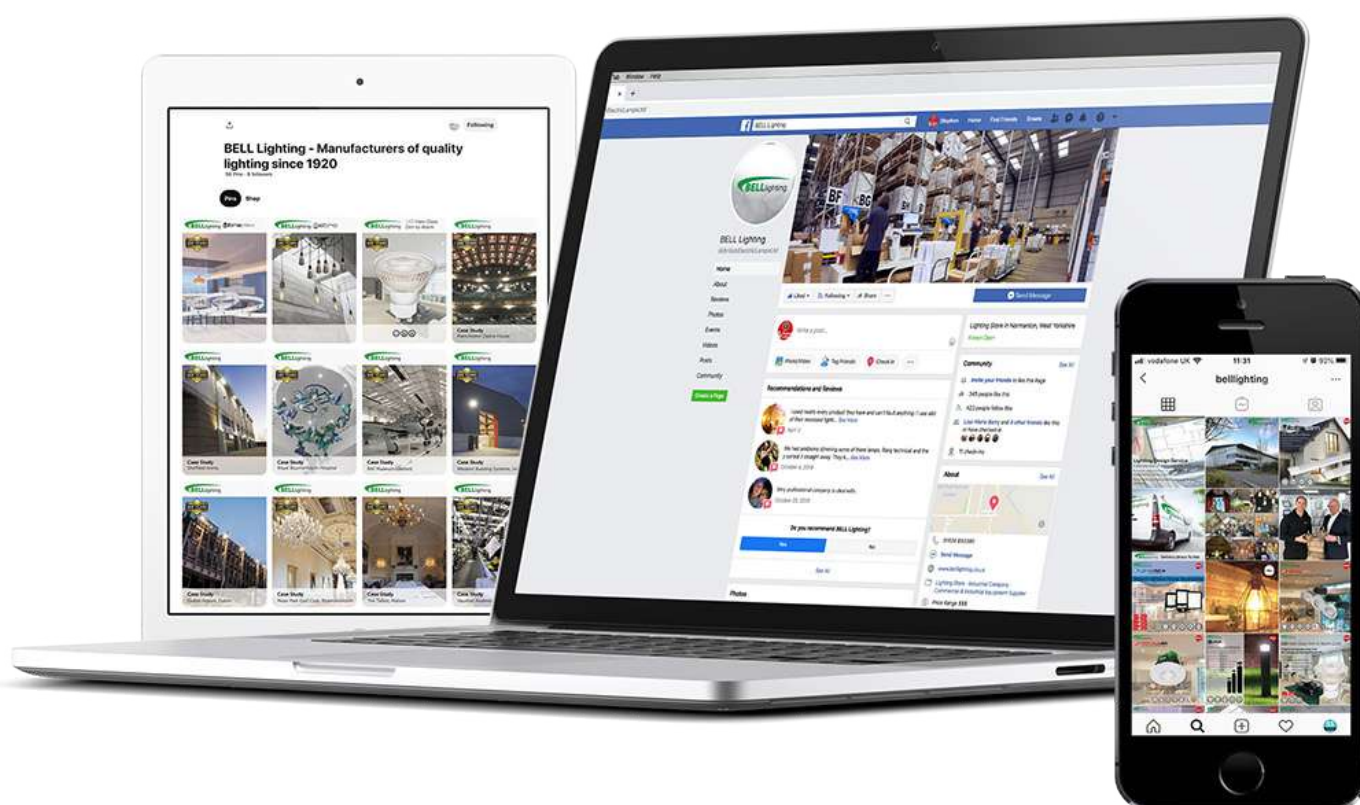

Think about the security requirements and the safe passage of staff and visitors when entering and leaving a building. Good exterior lighting can dramatically improve the look of a building so consider both lighting the area around the building and the elevations of the entrance area and side walls, the correct choice of fittings and colour temperature is important.

Social Media - Follow our channels

In less than 10 years, social media has become an essential part of our lives, follow BELL Lighting on our channels for all the latest LED lighting news, product updates, special promotions and much more.
